

Dog Kennels

Relax. It's a Qual Line Kennel. A safe, secure home for your dog.

When you need to contain your pet and want the best, give your dog a quality kennel from Qual Line Fence.

◆ To house your dog in comfort, our chainlink kennels are built with "slinkies" attaching the wire to the framework, reducing the chance of your dog getting hurt or getting out!

- ◆ For those dogs who like to attempt unapproved exits, Qual Line kennel gates are built with heavy commercial grade wire and dog proof latches.
- ◆ Qual Line kennels are created with your dog's owner in mind, too. Assembly is as easy as lifting the kennel off the trailer. There are no posts to dig or cement to mix. If you need to move your dog's kennel, it can be accomplished by two or three adults.
- ◆ Custom kennels can be ordered, including features such as access holes to accommodate outside dog houses, and sunscreens to keep your dog happy and healthy season-to-season.
