Commercial Kennels

Qual Line offers indoor and outdoor professional grade commercial kennels

Qual Line professional grade commercial kennels are made from your choice of Qual Line manufactured DiamondBack™, or a 6-gauge galvanized welded steel that even the largest dog cannot chew through.

All of our DiamondBack™ kennels include an outdoor roof designed to take a load of snow, and a slam latch built into the gate's welded pipe framework. Additional panels clamp together to create their own support system – lowering your cost by omitting unnecessary framing.

More options include:

- ◆ Isolation panels used to separate pets are made with food grade honeycomb core and metal encased edges – no areas for rot or germs
- ◆ Gates open inward for added security
- ◆ Galvanized steel can be painted or powder-coated to match surroundings
- ◆ Installed or delivered FOB in Waunakee, WI
