## Qual-Link™ Fence

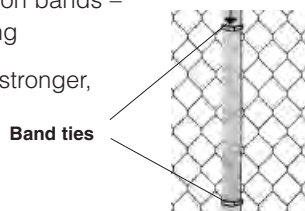

### Qual Line's chainlink fence is a popular fencing solution

Steel wire, woven into a diamond mesh "fabric," is resilient and springs back to its original form upon impact. Chainlink is economical, strong, durable and relatively unobtrusive. Common heights are 42", 48" and 60" for residential fences, and 72", 84", 96", 120" and 144" for commercial applications. Different specifications are required for higher fences.

- ◆ 11-1/2-gauge aluminum-coated wire
- ◆ 2 inch .065 line posts
- ◆ 2-1/2" Schedule 20 gate posts
- ◆ Posts set 36" deep
- ◆ Drive Anchors on gate posts add stability and prevent frost heave
- ◆ Hi-tensile bottom wire keeps fence taut, despite lawn mowers and dogs

- ◆ 1-5/8" top rail is about twice as strong as a normal 1-3/8" top rail
- ◆ Beveled brace and tension bands – heavier and better looking
- ◆ Band ties are smoother, stronger, tamper-proof and better looking than normal round wire ties

"Topless" chainlink fence with bracing

Qual Line "Diamond" gate bracing is our signature
